

What Customers Are Saying About Hyperion System 9 Financial Data Quality Management

Hyperion® System™ 9 Financial Data Quality Management™ (Hyperion FDM) increases your confidence in the numbers while lowering your cost of compliance. Read how real customers are benefiting from this enterprise-class solution.

Fifth Third Bank

“Hyperion System 9 Financial Data Quality Management was designed with ease-of-use in mind so that data integration support can be deployed and maintained by business users with minimal IT involvement. In addition to our G/L, we have multiple Hyperion applications including Hyperion Enterprise®, Hyperion Planning™, and Hyperion Financial Management™. We use Hyperion to integrate data and reconcile between them. Time devoted for development has been significantly reduced resulting in our ability to accelerate implementations. Recently, we developed a Hyperion FDM process in less than half the time it took for a technical consulting resource to develop with another tool. Additionally, Hyperion FDM provides built-in Sarbanes-Oxley controls for validations, source system data capture, audit logs, and transformation detail, helping ensure the visibility needed to meet internal and external controls.”

– Bret Furtwengler, Vice President, Financial Systems, Fifth Third Bank

Honeywell International

“We implemented multiple Hyperion Planning and Hyperion Financial Management applications with complex requirements. Hyperion System 9 Financial Data Quality Management software's easy-to-use, out-of-the-box solution helped us minimize the time, cost, effort, and risk of each application deployment by eliminating the need for extensive custom integration work. From application build and data reconciliation to end-user rollout and the monthly planning and close process, Hyperion FDM provides us with greater visibility to data and transparency of processes. Every number that is loaded is verifiable back to the source and person who loaded it. This helps ensure we are meeting internal controls and external compliance requirements.”

– John Heid, Director of Finance Systems, Automation and Control Solutions, Honeywell International, Inc.

EMCOR Group

“Thanks to *Hyperion System 9 Financial Data Quality Management*, EMCOR now has one unified solution that loads *Hyperion Enterprise* and *Hyperion Planning* while delivering unparalleled confidence in the quality and integrity of our financial information.”

– Nancy D. Mehiel, Director, Financial Reporting, EMCOR Group, Inc.
