

# Hyperion System 9 Financial Data Quality Management

*Hyperion® System™ 9 Financial Data Quality Management™ (Hyperion FDM) helps to increase your confidence in the numbers and lower your cost of compliance by eliminating data integrity risks associated with collecting, mapping, verifying, and moving critical financial data from across the enterprise.*

*Fully integrated with other Hyperion System 9 solutions, Hyperion FDM is the first and only enterprise-class system for managing the quality of financial data.*

## Highlights

- Increase your confidence in the numbers
- Simplify financial data collection and transformation
- Standardize with repeatable financial processes
- Lower the cost of compliance
- Deliver process transparency through audit trails
- Improve the productivity of finance staff
- Achieve timeliness of data with a Web-guided workflow process

## Complete transparency and verifiable data quality

Now more than ever, your finance organization is focusing on enhancing the quality of internal controls and financial reporting processes. To meet these goals, you need a transparent and auditable process that encompasses a source-to-report view of financial data.

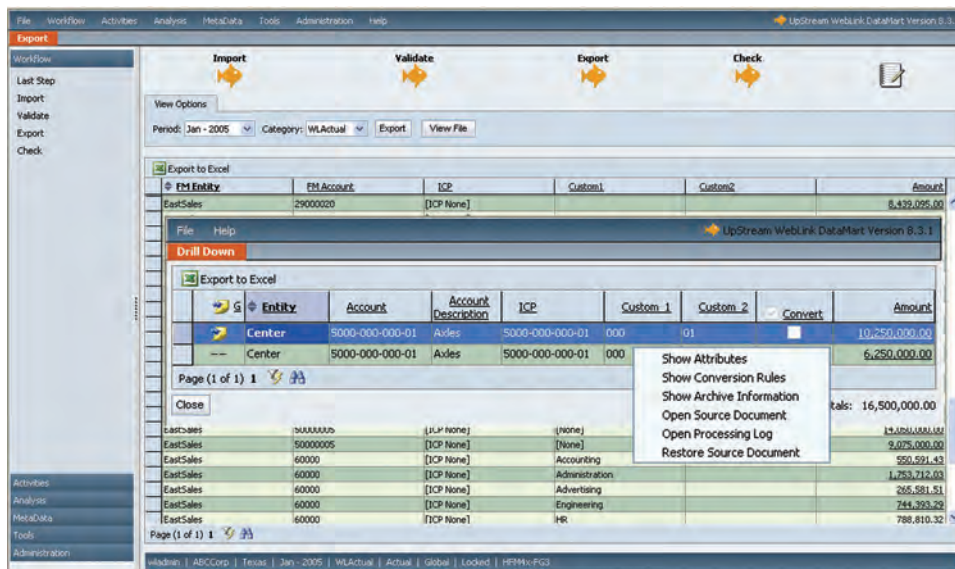

*Hyperion FDM* addresses these challenges by enabling complete transparency and verifiable data quality. This packaged solution empowers your business analysts to develop standardized financial data management processes and validate data from any source system—all while reducing costs and complexity.

# Key Features and Benefits

## Increase your confidence in the numbers

*Hyperion FDM* helps you avoid the typical inefficiency of collecting financial data by enabling you to build standardized, repeatable processes. Transparent processes and data give you greater assurance of accurate results.

- **End-to-end automation.** *Hyperion FDM* automates the collection, mapping, verification, and movement of financial data, enabling your business users to eliminate variability from your processes.
- **Data validations and quality checking.** You can validate and check data at every step in the process to identify errors, generate notifications, and reconcile discrepancies.
- **Robust reporting.** Cover all aspects of the process with more than 85 pre-built audit, log, system, and process management reports.

*Hyperion FDM delivers a web-based user interface that helps business users develop standardized financial data management processes.*

## Simplify financial data collection and transformation

With *Hyperion FDM*, you can eliminate data bottlenecks and manual file manipulation by efficiently importing data from a wide range of financial data sources.

- **A data preparation engine** to integrate, transform and validate data from any source system.
- **Unique “push” integration** verifies mapping and intersection, retrieves data for verification, and helps meet quality requirements of target systems.
- **Pre-packaged BPM Adapters** link to other Hyperion products, enabling you to further reduce integration costs and data mapping complexities.

### Lower the cost of compliance

*Hyperion FDM* helps you reduce annual audit fees by providing an integrated solution for tracking the movement and preparation of financial data.

- **Instant error checking** enables you to identify errors and notify stakeholders in a timely fashion.
- **Audit review** tracks evaluations, gap analysis, and action plans, and lets you trace consolidated financial results back to sources.
- **Automatic archival** enables you to safeguard supporting documentation in any format.
- **Closing functionality** links financial close activities with key internal controls and incorporates SOX 302 Sub Certifications and 404 Assessments.

### Improve the productivity of finance staff

*Hyperion FDM* streamlines the time-consuming task of manual data reconciliation by automating and verifying data submissions.

- **A Web-based user interface** enables business users to load, review, and verify data for any target system. A guided workflow helps them create sophisticated data mappings and repeatable processes.
- **Complete audit trails** from trial balance to report give users a transparent, intuitive view of data and processes.
